## March Connections

Introducing the new **IDEAL HeatSeeker™ Thermal Imager**

This is a groundbreaking thermal imager product, which brings the benefits of this versatile technology to the professional, the tradesperson and the non-specialist alike, at a very **Affordable Price**.

With the aid of the real-time thermal image display, the user can find, identify and measure the temperature of problem areas quickly and with confidence.

The flexibility, ease of use and above all the low cost of this product extend the normal application areas for thermal imaging from professional use to wider use in industrial, commercial and domestic applications.

Let your Springfield Electric representative know you're interested in a demo of the new Heatseeker or that you want more information on our lamp recycling options....

Standardization, reliability and ease of maintenance are 3 benefits realized by incorporating the **Intele-start panel** for pump control application. Contact your local Springfield Electric Sales Representative for more information.

Have you tried our **New Online Ordering System**? You can take a test drive without having a Login ID. To view your pricing and place an order, please visit the contact us page to request a login id and password. Information you see is real time for pricing & inventory.

You can now also search for non-stock/special order items & request a quote right from the system 24/7.
