Lutron. | **NEW** Radio Powr Savr™

wireless occupancy and vacancy sensor

A simple way to go green

An innovative, wireless sensor designed for easy installation and optimum savings.

ceiling-mounted
wireless RF
occupancy sensor

An innovative, wireless sensor designed for easy installation and optimum savings.

Installs in minutes

- sensor requires **no wiring**
- front accessible buttons make setup easy
- lens illuminates during test mode to verify ideal locations

Saves energy

- sensor turns lights off when room is unoccupied
- dimming adds additional energy savings

Superior capability

- 10-year battery life design
- cutting edge detection technology for sensing minor motions
- can communicate with up to 10 dimmers and switches
- add up to three sensors for maximum coverage

- Long barrel maximizes number of crimps and **provides premium wire pull-out strength and electrical performance**
- Color coded barrels marked with PANDUIT and specified competitor die index numbers for proper crimp die selection
- Enclosed barrel **prevents corrosive material** from entering barrel when used in harsh environments
- **Tin plated** to inhibit corrosion
- **UL Recognized** for use up to 35KV**, **temperature rated 90°C** and **CSA Certified** to 600V when crimped with PANDUIT and specified competitor crimping tools and dies. [More information](#)
