## Featured Products:

### 233 Remote Display Multimeter

**FLUKE**

- True-rms ac voltage and current for accurate measurements on non-linear signals
- Measure up to 1000 V ac and dc
- Measure up to 10 A (20 A for 30 seconds)
- 10,000  $\mu$ F capacitance range
- Frequency to 50 kHz
- Built in thermometer conveniently allows you to take temperature readings without having to carry a separate instrument
- Make measurements without holding the meter to improve visual focus on probes and augment safe electrical measurements
- Radio transmitter automatically turns off when the display is connected to the meter

### Fluke 1AC-I VoltAlert™

**FLUKE**

- NEW! Always on, uses special low power circuitry to sustain battery life and added dependability
- NEW! Includes innovative 'Battery Check' button function to ensure battery and unit are in good condition when using the tester, giving peace of mind any time you are testing\*
- Voltage detection of 90 to 1000 V ac, a wide range to suit a broad spectrum of residential, commercial and industrial needs
- Category IV 1000 V overvoltage rated product for best in class added user protection.
- Integrated clip design, optimized for pocket storage in a wide range of clothing thicknesses
- Powered by 2x AAA batteries (included)

- Two-year warranty
- Rugged, reliable, and is built with the quality and accuracy expected from a Fluke tool.

## UNIT HEATERS HUH-524TA

## Horizontal/Downflow Unit

The HUH724ST for a 50% increase in wattage! May allow the use of 1 heater instead of 2!!

- Heater comes equipped with ceiling mounting bracket for horizontal or vertical flow mounting or any position in between.
- Built-in single pole thermostat adjusts from 45° to 135°F.
- Eight wattages and two voltages make the HUH524TA field adjustable from 1874 watts at 208 volts to 5000 watts at 240 volts. The HUH724ST is adjustable up to 7500 watts.
- Automatic control delays fan action until heating element is warm. When thermostat is satisfied, fan continues to operate until heating element is cool. By preventing circulation of cold air and expelling excess heat, comfort level is raised and component life is extended.
- A high level cutout automatically shuts off current in event of overheating and reactivates the heater when temperature returns to normal.
- Dimensions are 14" wide, 12-1/2" tall and 11/1-4" deep.
