THE DSN DECONTACTOR

The DSN Decontactor is a combination of a plug/receptacle and a disconnect switch in the same device. These devices, which take the form of a plug and receptacle, are horsepower rated and switch rated to UL Standards 1682, 98 and 508. DSN plugs and receptacles are compact watertight devices, and perform as true functioning disconnect switches for motors and other inductive loads, without the need for an electrical or mechanical interlock. As a switch, the DSN is designed to make and break up to 600VAC and up to one and a half times their rated current, and can make or withstand a 10,000A short circuit, with a power factor as low as 0.45.

•UL listed 1682/1686; UL 98/508 performance listed as a disconnect switch and manual motor controller

•Models are available to cover 1/2 to 20HP and 120 to 600 volts.

Pre-Fabricated Box and Cover Assemblies

1. This new UL-listed product line extension includes 48 combinations of popular boxes, brackets and covers that speed installation because the time consuming assembly work is already done
2. Each assembly comes complete with a 1 1/2" or 2 1/8" deep 4" square box with a pre-installed grounding pigtail, and a choice of bracket and cover options. Covers are available in both single and two device configurations, raised 1/2", 5/8" and 3/4". Available brackets allow attachment to steel and wood stud and floor track, and include the new Steel City® Support Covers, which combine a bracket and a cover in one component.

Steel City®: We'll build the boxes so you can build your business.

SHAPE THE FUTURE

WITH ITS INNOVATIVE PROFILE, GREATER CAPACITY

and installation-friendly features, the 4000 Designer Series™ raceway helps you do what you do better. Unique downward facing activations deliver a streamlined profile in new designer colors to complement any décor. With one-third more wiring capacity than traditional profiles, it's the ideal raceway for your newer and larger capacity applications. And it's easier to install with features that offer flexibility as well as functionality, saving time and labor. The DS4000™ raceway. Everything you want in a raceway. And you want it all.
