If you're on the lookout for ways that your company or organization can cut energy consumption and save money, let the Springfield Electric Energy Management Solutions Team guide the way.

Our Energy Management Solutions Team has the skills and experience to assist you in finding efficient and practical ideas for reducing your energy bills.

Today, up to **30%** energy savings can be realized through energy management. Efficient devices and installation can bring **10 to 15%** energy savings, automation can add another **5 to 15%**, and monitoring and maintenance can protect **2 to 8%** of potential lost energy savings.  
- Schneider Electric USA, Inc.

## Four easy steps to energy savings...

### 1. **Contact the Springfield Electric EMS Team**

The Springfield Electric EMS Team has the expertise to track down information on all available utility rebates and various other incentives. We'll help you through the process of identifying the energy-savings measures that work best for your office, plant or other facility - as well as the methods for implementing them.

### 2. **Facility Audits Available**

Our team can perform a walk-through audit of your facility to identify energy-saving opportunities, including lighting, lighting controls, motor controls and many more energy-saving solutions.

### 3. **Analysis Provided**

We'll provide you with detailed audit information that includes a financial summarization, so you can make intelligent business decisions about what energy-saving options would be most cost-effective for your facility. We provide return on investment calculations and suggested actions based on our findings.

### 4. **Assistance with Implementation**

Our team can help you with procuring equipment, implementation, and filing the claims for all available incentives that your facility can receive from utility and government agencies. Let us help you put your energy plans into action that will lead to significant long-term energy savings.
